

Ablative Scale

Skin Prep	<p>Prepping the skin before any procedure is ideal to create an environment that is optimized for enhanced clinical outcomes. If a client is new to AnteAGE®, we recommend using the Serum and Accelerator at least 2 weeks prior to procedure. For clients getting lasers and deep peels, include Daily Brightener two weeks prior to help suppress melanin and reduce the risk of hyperpigmentation.</p>
Microdermabrasion	<p>Immediately After Treatment: Apply 1 vial of Exosomes, Growth Factor Solution or 2-3 pumps of Serum (Step 1). Day 2+: Resume normal application of Serum and Accelerator.</p>
Chemical Peels	<p>Immediately After Treatment: Apply a layer of Exosomes or Growth Factor Solution followed by a layer of Biogel. Day 2+: Continue playing biogel for the next week as needed. After seven days resume normal skincare of Serum and Accelerator.</p>
Radio Frequency /MN	<p>Immediately After Treatment: Apply Exosomes or Growth Factor Solution and/or Hyaluronic Acid. Day 2+: Resume normal application of Serum and Accelerator.</p>
Microneedling	<p>During Treatment: Apply Exosomes or Growth Factor Solution to treatment area and use as a glide for your device. Immediately After Treatment: Apply remaining Exosomes, Growth Factor Solution and extra HA throughout the day. Do not apply any other products, including SPF. 24 Hours Later: Resume normal application of Serum and Accelerator.</p>
Plasma Resurfacing (NeoGen, J Plasma, etc.)	<p>Immediately After Treatment: Apply Exosomes or Growth Factor Solution followed by a layer of Biogel. Day 1-7: 2-3 times a day apply a layer of Biogel. Day 7+: Continue to apply Biogel if needed.</p>
IPL/BBL	<p>Immediately After Treatment: Apply Exosomes, Growth Factor Solution or Brightening Solution to prevent PIH. Follow with 2-3 pumps each of Serum and Accelerator. Day 2+: Normal routine of Serum and Accelerator.</p>
Sublative/Fractional (Halo, Fraxel, etc.)	<p>Immediately After Treatment: Apply 1 vial of Exosomes or Growth Factor Solution followed by Biogel. Day 2-5: 2 times a day apply (on clean skin) Serum and Accelerator followed by Biogel. Day 5+: Normal routine of Serum and Accelerator may begin.</p>
Ablative (CO2, Erbium, etc.)	<p>Immediately After Treatment: Apply 1 vial of Exosomes or Growth Factor Solution followed by a layer of Biogel. Day 1-7: 2-3 times a day apply a layer of Biogel. Day 7+: Resume normal routine of Serum and Accelerator. Continue to apply Biogel if needed.</p>
