

The AnteAGE® Stem Cell Aftercare Kit

Growth Factors in your treatments are critical, but you also need Growth Factors daily.

Offer your patients a 5-day skincare sample to enhance their in-office Growth Factor treatments.

bone marrow stem cell conditioned media

+

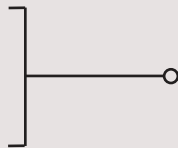

high molecular weight HA

formulated for a clean, rejuvenating solution

1

Use the 2ml vial of our Growth Factor Solution in your microneedling or radio frequency treatment.

If you are performing a more ablative treatment you can hand this vial to your patient to apply as needed to accelerate the healing and keep excess inflammation at bay.

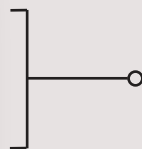

24 hours later your patients can begin applying growth factors topically, morning and night, with our Serum & Accelerator.

2

3

This formula contains High Molecular Weight Hyaluronic Acid. This glide is especially suitable to protect and soothe open skin and provides rapid hydration to compromised tissue. Apply as often as needed to hydrate the skin.

Give Your Patients Another Reason to Visit You

We are confident that your patients will love the healing effect of the two-step Serum & Accelerator System, so we offer a \$30 coupon inside the box to come back and buy a full set.
