

AnteAGE® Stem Cell Facial

IDEAL FOR: Significantly higher hydration levels, smoothing of fine lines and wrinkles, reducing redness and inflammation, refining pores and minimizing breakouts, reducing excess pigmentation, increasing microcirculation.

OVERVIEW OF THE STEPS

1. Cleanse (with AnteAGE® Green Tea Cleanser)

2. Exfoliate Skin (with AnteAGE® Regenzyme)

3. Treat (with AnteAGE® Growth Factor Solution)

4. Nourish (with AnteAGE® Serum and Accelerator + SPF of choice)

TECHNOLOGY PRIMER

The **AnteAGE® Stem Cell Facial** was designed by to increase cellular communication within the skin, enhancing and optimizing the skin's ability to repair and rejuvenate itself.

A **Microchanneling Stamp** creates tiny channels on the skin to deliver a condition targeted solution containing growth factors and cytokines derived from adult bone marrow stem cells.

Bone marrow stem cells contain the highest concentration of **cytokines** responsible for skin healing. As we age, we lose most of these stem cells and can result in chronic inflammation, redness, spots, wrinkles and other signs of aging. **Stem growth factors and cytokines** applied to the skin mimic the effect of having more stem cells leaving you with a youthful appearance.

Each targeted solution (**Anti-Aging, Brightening, Clarifying**) is enhanced with additional proteins and **biosignals** to address specific outcomes.

30 MINUTES

*May be increased to an hour with additional modalities added

The Stem Cell Facial has no downtime and instantly reveals glowing skin. In combination with our daily AnteAGE® Skincare System, we provide everything the skin needs to achieve unparalleled results.

TYPES OF TARGETED TREATMENT

ANTI-AGING

For collagen and texture

BRIGHTENING

For melanin regulation and overall glow

CLARIFYING

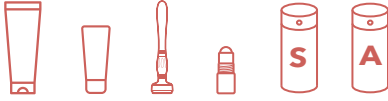

For acne and redness

BENEFITS

- Delivers the natural stem cell growth factors responsible for collagen stimulation and facial rejuvenation
- Naturally enhances cell function and stimulates repair activity
- Uses microchanneling device to increase efficiency of the AnteAGE® Microchanneling Solutions
- Promotes skin health without inflammation

PRODUCT

AnteAGE® Products Used:

- AnteAGE® Cleanser
- AnteAGE® Regenzyme
- AnteAGE® Microchanneling Stamp
- AnteAGE® Microchanneling Solution Vial
- AnteAGE® Serum
- AnteAGE® Accelerator

PRECAUTIONS

Should not be performed on clients:

- A)** A history of open sores in the area to be treated
- B)** A specific hypersensitivity to the ingredients in the products
- C)** Suffering from an acute outbreak of a dermatological disease

PRODUCT USE

PHASE ONE | CLEANSE

1. Make sure client is positioned in a comfortable manner on your treatment table.
2. Prepare the skin by thoroughly cleansing it of makeup, surface debris and excess oil. Take 1 pump of the AnteAGE® Cleanser in the palm of your hand. Massage over dry skin and add water to activate and emulsify all traces of makeup and debris. Remove cleanser completely with warm towels or sponges.
***Enhancement Tip: An ultrasonic spatula may be used during cleansing for a deeper cleanse.**
3. After removing the cleanser, you are ready to gently exfoliate surface dead skin cells for better penetration of AnteAGE® Microchanneling Solution. Take a quarter-sized amount of AnteAGE® Regenzyme and apply it to the full face, neck and décolleté with a fan brush. The enzyme mask is ideally kept moist, so a hot towel or steamer is recommended. Leave mask on the skin for 10-12 minutes. Remove thoroughly with hot towels or sponges.
4. Extractions may be performed at this time.
5. Application of a pH balance tonic may be used to remove any residual traces of enzyme.

PHASE TWO | TREAT

1. Prepare to use your Microchanneling Stamp and one skin-condition specific AnteAGE® Microchanneling Vial.
2. Working in sections, apply Solution to skin with the included rollerball vial.
3. Take the Microchanneling Stamp and press gently into the skin encouraging the Microchanneling Solution into the shallow channels created by the stamp needles.
4. Extreme pressure is not required. Do not rub the Stamp in a back and forth motion. Continue with this until all areas of the section being treated are covered. Apply additional Microchanneling Solution as needed.
5. Repeat this process to cover all areas of the face, neck and décolleté.
6. Once complete, apply remaining Solution to the client's face and massage into skin.
*** Enhancement Tip: At this stage, other modalities may be added, such as LED, to further initiate healing and repair.**

PHASE THREE | NOURISH

1. Apply 2 pumps of AnteAGE® Serum to skin, massaging in thoroughly.
2. Apply 2 pumps of AnteAGE® Accelerator to skin, massaging in thoroughly.
3. Finish with an application of chosen SPF.
4. Ask your client how their skin feels and provide post-treatment skincare and instructions.
5. Encourage a purchase of AnteAGE® Serum and Accelerator to maintain optimal skin health.
6. Advise client to return in 3 weeks to have an additional treatment performed.
