STEM CELL BRIGHTENING FACIAL

Brighten and revitalize your skin with a Stem Cell Facial. Everything you need for an at-home facial to fill in the gaps between office visits.

Cleanse

Always begin with a clean face. Apply the AnteAGE® Cleanser to dry face and massage using a circular movement. Rinse with warm water and towel dry skin.

Exfoliate

Next, using the enclosed Fan Brush, gently apply AnteAGE® Regenzyme to cover entire face. The powerful enzymes in this formula are supercharged by steam so applying this step in a steamy bathroom is a bonus. Once applied, warm the single-use moist towel in the microwave. Open to ensure a safe temperature and then drape the cotton towel on face and allow the Regenzyme to work for 10 minutes. Remove product thoroughly with warm water.

Microchannel

Now your skin is clean and prepped to receive the healing power of growth factors. Begin by rolling the AnteAGE® Solution vial all over face. Using the enclosed 0.25mm Microchanneling Stamp, gently stamp the solution into your skin in sections going horizontal and vertical. You may stamp the entire surface of face several times to maximize the benefits. Reapply the Solution generously when you have finished stamping.

Finish

Once you are done, finish the Stem Cell Facial by applying two pumps of AnteAGE® Serum and two pumps of AnteAGE® Accelerator to face, neck and décolletage. Apply morning and night until the product is gone.
