INTRODUCING

AnteAGE Hair Microchanneling Solution

5 (2 ml) Rollerball Vials

AnteAGE® Hair Microchanneling Solution incorporates recent advances in hair follicle science into a product that is easy to use and yields exceptional results. VEGF, a protein that helps create new blood vessels and regulates growth and maintenance of hair follicles, is combined with powerhouse ingredient Noggin, encouraging the cell signaling required to kick start hair follicle growth.

Using the rollerball vial, apply entire vial of solution to treatment area. Follow with a microchanneling or microneedling pen, stamp, or roller for maximum product penetration.
