

AnteAGE® Regenzyme

IDEAL FOR: Gentle, effective exfoliation to soften skin, remove dead skin cells, and leave skin feeling hydrated and prepped.

DURING TREATMENT

Prep the skin by cleansing thoroughly (with AnteAGE® Cleanser) to remove dirt, oil, and debris.

After cleansing skin, apply a thin layer to clean, damp skin. Activate enzymes with steam and leave on for 10-15 minutes.

Gently wipe off the product. Use an alcohol solution to remove thoroughly before performing any microneedling or stamping treatment.

Nourish with AnteAGE® Serum and Accelerator + SPF of choice.

PRO-TIP: Remove Regenzyme with a dark towel to avoid staining.

PRECAUTIONS

- Do not leave active enzymes on longer than 20 minutes.
- Remove thoroughly with cool water.
- Avoid direct contact with eyes.
- If contact occurs, rinse thoroughly with water.
- If skin is irritated, rinse immediately and discontinue use.

OTHER TREATMENTS

For home use or to be combined with AnteAGE Stem Cell Facial or any professional treatment where exfoliation is needed.
